**(CONVENIENCE TRANSLATION OF THE REPORT ON REVIEW OF INTERIM FINANCIAL
INFORMATION ORIGINALLY ISSUED IN TURKISH)**

**REPORT ON REVIEW OF INTERIM
FINANCIAL INFORMATION**

To the General Assembly of Turkland Bank A.Ş.

Introduction

We have reviewed the accompanying balance sheet of Turkland Bank A.Ş. (“the Bank”) as of June 30, 2021, and the statement of income, statement of income and expense items under shareholders’ equity, statement of changes in shareholders’ equity and statement of cash flows for the six-month period then ended, and a summary of significant accounting policies and other explanatory notes. The Bank management is responsible for the preparation and fair presentation of the accompanying interim financial information in accordance with “the Banking Regulation and Supervision Agency (“BRSA”) Accounting and Financial Reporting Regulations” including the regulation on “The Procedures and Principles Regarding Banks’ Accounting Practices and Maintaining Documents” published in the Official Gazette dated 1 November 2006 with No. 26333, and other regulations on accounting records of banks published by the Banking Regulation and Supervision Board and circulars and pronouncements published by the BRSA and Turkish Accounting Standard 34 “Interim Financial Reporting” principles for the matters not legislated by the aforementioned regulations. Our responsibility is to express a conclusion on this interim financial information based on our review.

Scope of Review

We conducted our review in accordance with the Independent Auditing Standard on Review Engagements 2410, “Review of Interim Financial Information Performed by the Independent Auditor of the Entity”. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial reporting process, and applying analytical and other review procedures. A review of interim financial information is substantially less in scope than an independent audit conducted in accordance with Independent Auditing Standards and the objective of which is to express an opinion on the financial statements. Consequently, a review of the interim financial information does not provide assurance that the audit firm will be aware of all significant matters which would have been identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information does not present fairly, in all material respects, the financial position of Turkland Bank A.Ş. as of June 30, 2021, and of the results of its operations and its cash flows for the six-month period then ended in accordance with the BRSA Accounting and Financial Reporting Regulations.

Report on Other Legal and Regulatory Requirements

Based on our review, nothing has come to our attention that causes us to believe that the interim financial information provided in the Management’s interim report included in the accompanying financial statements, is not presented fairly, in all material respects, and is not consistent with the reviewed interim financial statements and the explanatory notes.

Additional paragraph for English translation:

The effect of the differences between the accounting principles summarized in Section 3 and the accounting principles generally accepted in countries in which the accompanying financial statements are to be distributed and International Financial Reporting Standards (IFRS) have not been quantified and reflected in the accompanying financial statements. The accounting principles used in the preparation of the accompanying financial statements differ materially from IFRS. Accordingly, the accompanying financial statements are not intended to present the Bank's financial position and results of its operations in accordance with accounting principles generally accepted in such countries of users of the financial statements and IFRS.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

SECTION ONE

GENERAL INFORMATION

I. Bank's Incorporation Date, Beginning Statue, Changes in the Existing Statue

Turkland Bank Anonim Şirketi ("the Bank"), was established in 1991 in İstanbul under the name of "Bahreyn ve Kuveyt Bankası Anonim Şirketi" (BB&K). Its name was changed as "Tasarruf ve Kredi Bankası Anonim Şirketi" with its acquisition by Doğu Group in 1992. After the change in the name of the bank as "Garanti Yatırım ve Ticaret Bankası Anonim Şirketi" in 1994, Mehmet Nazif Günel (the main shareholder of MNG Group Companies) has acquired the Bank in 1997 and the name of the Bank has been changed as "MNG Bank Anonim Şirketi".

An agreement has been made with Arab Bank and BankMed for the sale of 91% of MNG Bank's shares in mid of 2006 and this agreement was approved by Banking Regulation and Supervision Agency (BRSA) on December 29, 2006. In this regard, while Arab Bank and BankMed purchasing 50% and 41% of MNG bank shares respectively, Mehmet Nazif Günel retained 9% of the shares. Transfer of the Bank was made on January 29, 2007. The title of the Bank was changed as "Turkland Bank Anonim Şirketi" with the amendment to the Articles of Association by the decision of the Extraordinary General Assembly at the meeting on March 22, 2007.

On April 3, 2007, "MNG BANK Anonim Şirketi" title of the bank was registered as "TURKLAND BANK Anonim Şirketi".

According to the Share Sale and Purchase Agreement and Board of Directors' Decision dated February 26, 2010 and July 15, 2010 respectively, Mehmet Nazif Günel's 153 million shares with TRY 15,300 nominal value were purchased by BankMed SAL. As of July 22, 2010 the share transfer was realized.

According to the Extraordinary General Assembly decision dated May 30, 2011, it was decided to increase the Bank's capital from TRY 170 million to TRY 300 million, and it was registered in the Turkish Trade Registry Gazette dated June 20, 2011 numbered 7840. According to the BRSA approval dated September 15, 2011 numbered 4381 the unused pre-emptive right of Arab Bank Plc amounting to TRY 65 million have been used by Arab Bank (Switzerland) Ltd (ABS). Capital commitments have been paid by shareholders and according to the BRSA decision dated October 20, 2011 numbered 22244 it has been transferred to the capital accounts.

According to the Ordinary General Assembly decision dated April 18, 2013, it has been decided to increase the Bank's paid in capital from TRY 300 million to TRY 500 million. According to the Ordinary General Assembly decree dated April 15, 2014, it was decided to increase the Bank's paid in capital from TRY 500 million to TRY 650 million.

In accordance with the BRSA's approval letter dated May 7, 2019, 16.67% of the shares of Arab Bank (Switzerland) Ltd (ABS), one of the shareholders of the Bank, was transferred to Arab Bank Plc. which is the other shareholder of the Bank.

Capital increase and decrease of 30 million USD additional capital as 164 million TRY has been realized simultaneously on September 25, 2019 with the approval of BRSA on August 2, 2019.

According to the Extraordinary General Assembly decree dated February 17, 2020, it was decided to increase the Bank's paid in capital from TRY 650 million to TRY 1,000 million with the approval of BRSA dated January 29, 2020 numbered 1027. It has been transferred to capital accounts as of March 4, 2020 with the approval of BRSA dated March 3, 2020 numbered 2400.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

SECTION THREE
ACCOUNTING PRINCIPLES

I. Basis of Presentation

The unconsolidated financial statements are prepared within the scope of the “Regulation on Accounting Applications for Banks and Safeguarding of Documents” related with Banking Act numbered 5411 published in the Official Gazette No.26333 dated November 1, 2006 and in accordance with the regulations, communiqués, interpretations and legislations related to accounting and financial reporting principles published by the Banking Regulation and Supervision Agency (“BRSA”), and in case where a specific regulation is not made by BRSA, and “Turkish Financial Reporting Standards” (“TFRS”) and related appendices and interpretations put into effect by Public Oversight Accounting and Auditing Standards Authority (“POA”). The format and content of the publicly announced unconsolidated financial statements and notes to these statements have been prepared in accordance with the “Communiqué on Publicly Announced Financial Statements, Explanations and Notes to These Financial Statements” and “Communiqué On Disclosures About Risk Management To Be Announced To Public By Banks “and amendments to this Communiqué. The Bank maintains its books in Turkish Lira in accordance with the Banking Act, Turkish Commercial Code and Turkish Tax Legislation.

The financial statements are prepared in accordance with the historical cost basis except for financial instruments measured at fair value through profit or loss and financial assets measured at fair value through other comprehensive income which are presented on a fair value basis.

The Bank has started to apply TFRS 9 Financial Instruments (“TFRS 9”) published by Public Oversight Accounting and Auditing Standards Authority (“POA”) in the accompanying unconsolidated financial statements starting from January 1, 2018 for the first time based on the regulation published in the Official Gazette no. 29750 dated June 22, 2016 in connection with procedures and principals regarding classification of loans and allowances allocated for such loans which came into force starting from January 1, 2018.

The preparation of financial statements in conformity with TFRS requires the use of certain critical accounting estimates by the Bank management to exercise its judgment on the assets and liabilities of the balance sheet and contingent issues as of the balance sheet date. These estimates, which include the fair value calculations of financial instruments and impairments of financial assets are being reviewed regularly and, when necessary, suitable corrections are made and the effects of these corrections are reflected to the income statement.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

II. Explanations on Usage Strategy of Financial Assets and Foreign Currency Transactions

The Bank focuses its activities in corporate banking. The primary objective of the Bank is to sustain liquidity while fulfilling customer needs. Thus, the Bank places approximately 10.87% of its resources in liquid assets, while the Bank also aims for the highest yield possible with effective maturity management.

Besides its principle activity, the main financial instruments of the Bank are money market placements, treasury bills and government bonds.

Marketable securities comprising 9.81% of total assets are assets with low risk and high yield. Placements in banks are 9.46% of the total assets and these assets provide liquidity with low risk and yield.

The Bank aims at creating an optimum maturity risk and working with a positive margin between cost of resource and product yield in the process of asset and liability management.

As a component of the risk management strategy of the Bank, the management of risk bearing short positions of currency, interest or price movements is performed only by the Treasury and using the limits defined by the Board of Directors.

III. Explanations on Forward and Option Contracts and Derivative Instruments

The Bank's derivative instruments consist of foreign currency swaps, forward foreign currency buy/sell transactions and options. Derivative instruments are accounted for at their fair values as at the contract date and subsequently valued at fair value. Certain derivative instruments, although economical hedges, are accounted as trading transactions since they are not qualified to be a hedging instrument as per "Financial Instruments" ("TFRS 9"). Realized gains or losses on these instruments are reflected in the statement of income.

Unrealized gains or losses arising from the change in the fair value are recorded in disallowable expenses or income according to the current tax legislation.

Contract amounts of derivatives are recorded in off the balance sheet contingencies and commitments. There are no embedded derivatives separated from the host contract or that are designated as hedging instruments as of the balance sheet date.

IV. Explanations on Interest Income and Expenses

Interest income and expenses are recognized in the income statement on an accrual basis using the effective interest method. On January 1, 2018, the Bank has started to calculate the rediscount for its non-performing loans. Non-performing loans are discounted with effective interest rate over the net book value and for calculated amount expected credit loss is set aside in income statement.

V. Explanations on Fees and Commission Income and Expenses

All fees and commission income/expenses are recognized as income at the time of realization and during the service is provided. Loan related fees and commissions paid to or received from the other institutions are considered as transaction costs and accounted using the effective interest method.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VI. Explanations on Financial Assets

In the framework of “IFRS 9 Financial Instruments”, which is effective as of January 1, 2018, the Bank classifies its financial assets as “Financial assets at fair value through profit or loss”, “Financial assets at fair value through other comprehensive income” or “Financial assets at amortized cost”. This classification is made during initial recognition based on the contractual cash flow characteristics with the business model of the financial assets determined by management.

The financial assets are recognized or derecognized in accordance with the “Recognition and Derecognition” principles defined in Section 3 related to classification and measurement of financial instruments of the “IFRS 9 Financial Instruments”. At initial recognition, financial assets are measured at fair value. In the case of financial assets are not measured at fair value through profit or loss, transaction costs are added or deducted to/from their fair value. Financial instruments are included in the Bank's balance sheet if the Bank is a legal party to these financial instruments.

Financial instruments comprise financial assets, financial liabilities and derivative instruments. Financial instruments affect liquidity, market, and credit risks on the Bank's balance sheet in all aspects. Bank trades these instruments on behalf of its customers and on its own behalf.

Basically, financial assets create the majority of the commercial activities and operations of the Bank. These instruments expose, affect and diminish the liquidity, credit and interest risks in the financial statements.

All regular way purchases and sales of financial assets are recognized on the settlement date. The settlement date is the date that the asset is delivered to or by the Bank. Settlement date accounting requires (a) accounting of the asset when acquired by the institution and (b) disposing of the asset out of the balance sheet on the date settled by the institution; and accounting of gain or loss on disposal. Changes in fair value of assets to be received during the period between the trade date and the settlement date are accounted for in the same way as the acquired assets.

Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the marketplace.

The methods and assumptions used in the recognition and measurement of financial instruments are described below.

Financial Assets at Fair Value Through Profit or Loss

Financial assets at fair value through profit and loss are financial assets other than the ones that are managed with business model that aims to hold assets to collect contractual cash flows or to collect cash flows that are solely payments of principal and interest on the principal outstanding amount; that are either acquired for generating a profit from short-term fluctuations in prices or are financial assets included in a portfolio aiming to short-term profit taking.

Financial assets at the fair value through profit or loss are initially recognized at fair value. Transaction costs related to the acquisition of the relevant asset are included in the cost of acquisition. The positive difference between the cost and fair value of such securities is accounted as interest and income accrual, and the negative difference between the cost and fair value is accounted under “Provision for Impairment of Securities Account”.

Financial Assets at Fair Value Through Other Comprehensive Income

Financial assets are classified as financial assets at fair value through other comprehensive income where the business models aim to hold financial assets in order to collect the contractual cash flows and selling assets and the terms of financial assets give rise to cash flows that are solely payments of principal of interest at certain dates.

The Bank's management may retain both the contractual cash flows as well as the portfolio for sale, in order to meet daily liquidity needs, maintain a certain level of interest income and align the maturity of financial assets with the valuation of the financial liabilities for funding purposes. Financial assets at fair value through other comprehensive income are initially recognized at fair value including transaction costs.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VI. Explanations on Financial Assets (continued)

Financial Assets at Fair Value Through Other Comprehensive Income (continued)

The results of the subsequent changes in the fair value of financial assets at fair value through comprehensive income, namely unrealized gain or loss are recorded in “Other Comprehensive Income/Expense Items to be Recycled to Profit or Loss”. Accumulated fair value gain or loss, previously reflected in equity, is recorded to the income statement when the said financial assets are disposed.

The fair value of financial assets at fair value through other comprehensive income, which are traded in active markets is determined according to the price of the stock exchange and in the case that the stock market price is not available, according to the price in the Official Gazette. Where there is no quoted price in an active market, the fair value is determined by using other methods specified in TFRS 9.

Financial Assets at Amortized Cost

A financial asset is classified as a financial asset measured at amortized cost, if the financial asset is held within the scope of a business model for the collection of contractual cash flows and the contractual terms of the financial asset result in cash flows that include payments arising only from principal and interest on the principal amounts on specific dates.

After the initial recognition, provision for impairment to be deducted, if any, financial assets measured at amortized cost are recognized with discounted value using effective interest method (internal rate of return).

Interest earned from financial assets measured at amortized cost is recorded as interest income. The Bank classifies financial assets in accordance with the classifications explained above during the acquisition of the mentioned assets.

The Bank has Consumer Price Indexed (CPI) government bonds classified as financial assets measured at amortized cost. These securities are valued and accounted for using effective interest rate method considering estimated inflation rate based on real coupon rates and reference inflation index at issue date. As stated in CPI Indexed Bonds Investor Guide of the Undersecretariat of Treasury, the reference index used in the calculation of the actual coupon payment amounts of these securities are generated according to the CPI of two months ago. The Bank determines the estimated inflation rate accordingly. The inflation rate anticipated by considering the expectations of the Central Bank of Turkey. The estimated inflation rate of Bank is updated during year when deemed necessary.

Loans

Loans are non-derivative financial assets which have fixed or determinable payments and are not traded.

The Bank initially records loans and receivables at fair value. In subsequent periods, in accordance with TAS, loans are measured at amortized cost using effective interest rate method.

Foreign currency indexed loans are converted into TRY from the foreign currency rate as of the opening date and followed in TRY accounts. Repayments are measured with the foreign currency rate at the payment date, the foreign currency gains and losses are reflected to the statement of income.

Foreign exchange gains and losses on the foreign currency indexed loans are presented under foreign exchange gains and losses.

All loans of the Bank are monitored under the “Financial Assets at Amortized Costs” account.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VI. Explanations on Financial Assets (continued)

TFRS 9 Financial Instruments

TFRS 9 introduced new requirements for the classification and measurement of financial assets / liabilities and for derecognition and for general hedge accounting.

Key requirements of TFRS 9:

- All recognized financial assets that are within the scope of TFRS 9 are required to be subsequently measured at amortized cost or fair value. Specifically, debt investments that are held within a business model whose objective is to collect the contractual cash flows, and that have contractual cash flows that are solely payments of principal and interest on the principal outstanding are generally measured at amortized cost at the end of subsequent accounting periods. Debt instruments that are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets, and that have contractual terms that give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, are generally measured at FVTOCI. All other debt instruments and equity instruments are measured at their fair value at the end of subsequent accounting periods. In addition, under TFRS 9, entities may make an irrevocable election to present subsequent changes in the fair value of an equity investment (that is not held for trading nor contingent consideration recognized by an acquirer in a business combination) in other comprehensive income, with only dividend income generally recognized in profit or loss.
- With regard to the measurement of financial liabilities designated as at fair value through profit or loss, TFRS 9 requires that the amount of change in the fair value of a financial liability that is attributable to changes in the credit risk of that liability is presented in other comprehensive income, unless the recognition of such changes in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss. Under TAS 39, the entire amount of the change in the fair value of the financial liability designated as fair value through profit or loss is presented in profit or loss.
- In relation to the impairment of financial assets, TFRS 9 requires an expected credit loss model, as opposed to an incurred credit loss model under TAS 39. The expected credit loss model requires an entity to account for expected credit losses and changes in those expected credit losses at each reporting date to reflect changes in credit risk since initial recognition. In other words, it is no longer necessary for a credit event to have occurred before credit losses are recognized.
- The new general hedge accounting requirements retain the three types of hedge accounting mechanisms currently available in TAS 39. Under TFRS 9, greater flexibility has been introduced to the types of transactions eligible for hedge accounting, specifically broadening the types of instruments that qualify for hedging instruments and the types of risk components of non-financial items that are eligible for hedge accounting. In addition, the effectiveness test has been overhauled and replaced with the principle of an 'economic relationship'. Retrospective assessment of hedge effectiveness is also no longer required. Enhanced disclosure requirements about an entity's risk management activities have also been introduced.

Based on an analysis of the Bank's financial assets and financial liabilities as at January 1, 2018 based on the facts and circumstances that exist at that date, it has been assessed that the impact of TFRS 9 to the Bank's unconsolidated financial statements as follows:

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VI. Explanations on Financial Assets (continued)

TFRS 9 Financial Instruments (continued)

Classification and measurement

Classification and measurement of financial assets in accordance with TFRS 9 standard has determined by whether the financial asset is based on the business model in which the financial asset is managed and whether it is based on contractual cash flows including interest payments on principal and principal balance only.

On initial adoption in the financial statements, each financial asset can be classified as a financial asset measured at amortized cost, or at fair value through profit or loss, or as measured at fair value through other comprehensive income. The application of the existing provisions of TAS 39 for the classification and measurement of financial liabilities does not change substantially.

According to TFRS 9, Available for Sale Financial Assets and Held to Maturity Financial Assets are classified as Financial Assets at Amortized Cost as of January 1, 2018.

Impairment:

In accordance with the "Regulation on Procedures and Principles for the Classification of Loans and the Provisions to be Reserved" published in the Official Gazette dated June 22, 2016 and numbered 29750, the Bank started to recognize provision for impairment in accordance with the provisions of TFRS 9 as of January 1, 2018. In this context, the method of allocating loan provisions, which is disclosed in detail in the accounting policy of Section Three, footnote VII, as of December 31, 2017, has been changed by applying the TFRS 9 along with applying the expected credit loss model. The expected credit losses estimate is unbiased, weighted by probability and should include supportable information about estimates of past events, current conditions and future economic conditions. These financial assets have been classified into the following three categories based on the increase in the credit risks observed since the first receipt of financial assets:

Stage 1: Includes financial instruments with no significant increase in credit risk starting from initial recognition until the next reporting period or at a lower credit risk as of the reporting date. For these assets, the expected credit loss of 12 months is accounted.

Stage 2: Includes financial assets that have a significant increase in credit risk after initial recognition but an objective evidence of impairment does not exist. For these assets, expected lifetime credit losses are accounted.

Stage 3: Includes financial assets that have objective evidence of impairment as of the reporting date. For these assets, expected lifetime credit losses are accounted.

The Bank has applied the classification, measurement and impairment effects to the opening equity amounts without making any adjustments during the comparative periods in the opening balance sheet as of January 1, 2018. In addition, the effect of deferred tax assets to be calculated under TFRS 9 has reflected in equity during the first transition.

"TFRS 9 Financial Instruments" standard related to the classification and measurement of financial instruments has been issued by the Public Oversight, Accounting and Auditing Standards Authority and published in the Official Gazette dated January 19, 2017, numbered 29953 is effective from January 1, 2018 and replaces "TAS 39 Financial Instruments: Recognition and Measurement" standard.

At every balance sheet date, the Bank evaluates the carrying amounts of its financial asset or a group of financial assets to determine whether there is an objective indication that those assets have suffered an impairment loss. If any such indication exists, the Bank determines the related impairment.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VII. Explanations on Impairment of Financial Assets

A financial asset or a financial asset group incurs impairment loss only if there is an objective indicator related to the occurrence of one or more than one event ("loss event") after the initial accounting of that asset; and such loss event (or events) causes, an impairment as a result of the effect on the reliable estimate of the expected future cash flows of the related financial asset and asset group. Irrespective of high probability the expected losses for future events are not journalized.

The Bank classifies loans according to their qualifications in accordance with the "Regulation on Procedures and Principles for the Classification of Loans and the Provisions to be Made" effective as of January 1, 2018. In this context, the Bank considers the general structure of the loan portfolio, the financial structure of its customers, non-financial data and economic conjuncture in accordance with its credit risk policies when making estimations. Provisions are recognized in profit and loss accounts using the "TFRS 9 Expected Loss Provisions" account.

Provisions made for loan losses in the current period and provision made in the previous periods are reversed as a result of principal collections made for the related loans or that are written off are recorded in the "Expected Loss Provisions" account.

Calculation of expected credit losses

Expected credit losses are calculated based on a probability-weighted estimate of credit losses (i.e. the present value of all cash shortfalls) over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due based on the contract and the cash flows that are expected to be received.

Probability of Default (PD): PD refers to the likelihood that a loan will default, which is usually set at 12 months, given certain characteristics. Based on TFRS 9, two different PDs are used in order to calculate expected credit losses:

- 12-month PD: as the estimated probability of default occurring within the next 12 months.
- Lifetime PD: as the estimated probability of default occurring over the remaining life of the financial instrument.

Internal rating systems are used in the Bank.

Probability of default calculation has been carried out based on past information, current conditions and forward looking macroeconomic parameters.

Loss Given Default (LGD): If a loan default occurs, it represents the economic loss incurred on the loan. It is expressed as a percentage. LGD calculations are performed using historical data which best reflects current conditions, by formation of segments based on certain risk factors that are deemed important for each portfolio and inclusion of forward-looking information and macroeconomic expectations. LGD summarizes all cash flows from customers subsequent to default. It covers all costs and collections that occur during the collection cycle, including collections from collaterals. It also includes the "time value of money" calculated by means of deducting costs and additional losses from the present value of collections.

Exposure at Default (EAD): For cash loans, it corresponds to the amount of loan granted as of the reporting date. For non-cash loans and commitments, it is the value calculated through using credit conversion factors.

Stage 1: 12-month expected credit loss represents the expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date and calculated as the portion of lifetime expected credit losses. 12-month expected credit loss is calculated based on a probability of default realized within 12 months after the reporting date. Such expected 12-month probability of default is applied on an expected exposure at default, multiplied by loss given default rate and discounted with the original effective interest rate.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VII. Explanations on Impairment of Financial Assets (continued)

Stage 2: Lifetime expected credit losses are expected credit losses from all possible default events that can occur during the expected life of a financial instrument (the risk of a default occurring during the expected life of the financial instrument is estimated). In Stage 2, the provision is calculated for financial assets whose credit risk has deteriorated but not impaired.

Stage 3: The Bank evaluates all impaired accounts individually. The methodology is individual assessment and the probability of default is considered as 100%.

Default Definition: It means debt having past due more than 90 days. Whenever it is considered that an obligor is unlikely to pay its credit obligations, it should be considered as defaulted regardless of the existence of any past-due amount or of the number of days past due.

The Bank calculates the expected credit losses in Stage 1 and Stage 2 by groups based on the following criteria.

- Cash Products / Non-cash Products
- Customer Segments: Commercial and Retail / Corporate
- Product Types: Instalment Credits, Renewable Loans (Rotative), Spot Loan, Overdraft Accounts and Other

Due to the disruptions in economic and commercial activities as a result of the COVID-19 epidemic spread to many countries including our country within the scope of Article 4 and 5 of the Regulation On Procedures And Principles For Classification Of Loans And Provisions in accordance with the BRSA Decision, the 90-day delay period envisaged for the classification of non-performing loans is 180 days until September 30, 2021 for the loans monitored in stage 2 and it is decided that in the calculation of the expected credit losses in accordance with TFRS 9, the banks will continue to allocate the ECL to be set aside, as per their risk models, for the loans that continue to be classified in stage 2 despite the 90-day delay. As of June 30, 2021, the bank has 1 customers within this scope.

Considering the magnitude of the economic changes due to COVID-19, the Bank updated its forward-looking macroeconomic assumptions and estimations for individual loans in the calculation of expected credit losses. In the upcoming periods, the Bank will update its related assumptions as necessary and review the realization status of its past estimates.

VIII. Explanations on Offsetting of Financial Assets and Liabilities

Financial assets and liabilities are offset when the Bank has a legally enforceable right to set off, and the intention of collecting or paying the net amount of related assets and liabilities or the right to offset the assets and liabilities simultaneously. Otherwise, there is not any offsetting transaction about financial assets and liabilities.

IX. Explanations on Sales and Repurchase Agreements and Lending of Securities

The sales and purchase of government securities under repurchase agreements made with the customers are being recorded in balance sheet accounts in accordance with the Uniform Chart of Accounts. Accordingly in the financial statements, the government bonds and treasury bills sold to customers under repurchase agreements are classified under financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and financial assets measured at amortized cost depending on the portfolio they are originally included in and are valued according to the valuation principles of the related portfolios. Funds obtained from repurchase agreements are classified as a separate sub-account under money markets borrowings account in the liabilities.

Funds given against securities purchased under agreements to resell (“reverse repo”) are accounted under “Receivables from reverse repurchase agreements” on the balance sheet. The difference between the purchase and determined resell price is accrued over the life of repurchase agreements using the effective interest method. The Bank does not have any securities that are subject to any payment.

The income and expenses from these transactions are reflected to the “Interest Income on Money Market Transactions” and “Interest Expense on Money Market Transactions” accounts in the income statement.

As of June 30, 2021, the Bank does not have any reverse repo transaction. (December 31, 2020: 195,096 TRY).

As of June 30, 2021, the Bank does not have any marketable securities lending transaction (December 31, 2020: None).

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

X. Explanations on Assets Held for Sale and Discontinued Operations

Assets held for sale with high probability of sale, are those under a plan prepared by the management regarding the sale of the asset to be disposed (or else the group of assets), together with an active program for determination of buyers as well as for the completion of the plan. In addition, the asset (or else the group of assets) shall be actively marketed in conformity with its fair value. On the other hand, the sale is expected to be journalized as a completed sale within one year after the classification date; and the necessary transactions and procedures to complete the plan should demonstrate the fact that the possibility of making significant changes or cancelling the plan is low.

The Bank has assets held for sale amount of 228,645 TRY as of June 30, 2021 (December 31, 2020: 179,054).

A discontinued operation is a division of a bank that is either disposed or held for sale. Results of discontinued operations are included in the income statement separately. The Bank does not have any discontinued operations.

XI. Explanations on Goodwill and Other Intangible Assets

There is no goodwill regarding the investments in associates and subsidiaries.

Other intangible assets are accounted for at cost less accumulated amortization. Other intangible assets are amortized with straight-line method based on their economic lives. There is no change in the amortization method in the current period.

The intangible assets comprising purchased softwares are in the other intangible fixed assets. As of the balance sheet date, all softwares are purchased and there are no completed or continuing software development projects by the Bank.

	%
Intangible Assets	7-33

XII. Explanations on Tangible Fixed Assets

Tangible fixed assets are accounted for at acquisition cost less accumulated depreciation. Tangible fixed assets are depreciated with straight-line method. While those acquired before January 1, 2004 are depreciated with the rates valid in prior periods, the fixed assets acquired after January 1, 2004 are depreciated with the rates determined by the Ministry of Finance based on useful economic lives.

Depreciation of assets held less than one year as of the balance sheet date is accounted for proportionately. Depreciation method is not changed in the current period. The annual rates used, which approximate rates based on the estimated economic useful lives of the related assets, are as follows:

	%
Financial Lease	2-50
Furniture, fixtures and office equipment and others	2-33

Gain or loss resulting from disposals of the tangible fixed assets is reflected to the income statement as the difference between the net proceeds and net book value.

Normal maintenance and repair cost of the properties are expensed.

There is no pledge, mortgage, or any other lien on tangible fixed assets.

AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

XIII. Explanations on Leasing Transactions

As of the balance sheet date, the Bank does not have authorization for any financial leasing transactions as lessor.

IFRS 16 Leases Standard was published in the Official Gazette dated April 16, 2018 and numbered 29826. According to this standard, the difference between operating leases and financial leases has been eliminated and leasing transactions is reflected on the balance sheet by the lessee as the asset (utilization right) and lease payable, and the interest expense related to the lease liability has reflected to the accounts separately. The Bank started to use IFRS 16 Leases standard starting from January 1, 2019.

The Bank measures the leasing liability at the present value of the remaining lease payments, discounted at the Bank's application date using the reference interest rate at the date of application. In addition, the Bank measures the existence of the right to use of such right at an amount equal to the lease obligation which is reflected in the statement of financial position immediately after the first application date and adjusted for the amount of all prepayment or accrued lease payments.

In accordance with IFRS 16, the Bank measures the lease obligation based on the present value of the lease payments, which were not paid at the date of the lease commencement. Lease payments are discounted using the reference rate of the Bank.

The Bank assesses whether the contract has the quality of a lease or whether the lease includes the transaction at the beginning of a contract. In case the contract is transferred for a certain period of time to control the use of the asset defined for a price, it is either leased or includes a lease. The Bank reflects the existence of a right of use and a lease liability to the financial statements at the effective date of the lease.

Right of use assets:

The right to use asset is first recognized by cost method and includes:

- a) The initial measurement amount of the lease obligation,
- b) The amount obtained by deducting all the rental incentives received from all lease payments made at or before the beginning of the lease;
- c) All initial direct costs incurred by the Bank

When Bank applying the cost method, the existence of the right to use:

- a) accumulated depreciation and accumulated impairment losses are deducted and
- b) measures the restatement of the lease obligation at the restated cost. The Bank applies TAS 16 Property, Plant and Equipment while depreciating the right of use assets.

The Lease Obligations:

At the effective date of the lease, the Bank measures its leasing liability at the present value of the lease payments not paid at that time. Lease payments are discounted using the Bank's average borrowing interest rates.

The lease payments included in the measurement of the lease liability consist of the payments to be made for the right of use during the lease term of the underlying asset and the unpaid payments at the effective date of the lease.

After the effective date of the lease, the Bank measures the leasing liability as follows:

- a) Increase the book value to reflect the interest on the lease obligation
- b) Reduces the book value to reflect the lease payments made and
- c) The book value is measured to reflect reassessments and restructuring, or reflect to fixed lease payments as of revised nature.

The interest on the lease liability for each period in the lease period is the amount calculated by applying a fixed periodic interest rate to the remaining balance of the lease liability.

NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

XIV. Explanations on Provisions and Contingent Liabilities

Provisions are recognized when there is a present obligation due to a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. Provisions are determined by using the Bank's best expectation of expenses in fulfilling the obligation, and discounted to present value if material.

According to the legal department of the Bank, the total number of ongoing cases against the Bank is 332. The total amount of those cases consists of TRY 16,354, USD 804 Thousand and EUR 193 Thousand. There is a provision of TRY 9,168 in the accompanying financial statements for these cases (December 31, 2020: TRY 9,064).

XV. Explanations on Liabilities Regarding Employee Benefits

Defined Benefit Plans:

In accordance with existing social legislation in Turkey, the Bank is required to make lump-sum termination indemnities over a 30-day salary to each employee who has completed over one year of service, whose employment is terminated due to retirement or for reasons other than resignation or misconduct. The Bank is also required to make a payment for the period of notice calculated over each service year of the employee whose employment is terminated for reasons other than resignation or misconduct. Total benefit is calculated in accordance with TAS No: 19 "Turkish Accounting Standard on Employee Benefits".

Such benefit plans are unfunded since there is no funding requirement in Turkey. The cost of providing benefits to the employees for the services rendered by them under the defined benefit plan is determined by independent actuaries annually using the projected unit credit method. As per the Official Gazette No. 28585 dated March 12, 2013, as of June 30, 2021, the actuarial gains recognized in equity amounts to TRY 545 (December 31, 2020: TRY 225 actuarial gain).

The Bank has no employees are the member of retirement fund or foundation.

Defined Contribution Plans:

The Bank pays contributions to the Social Security Institution of Turkey on a mandatory basis. The Bank has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due.

Short-term Employee Benefits:

In accordance with TAS 19 "Turkish Accounting Standard on Employee Benefits"; defined liabilities that arise from unused leave payments are accrued in the related period and are not discounted.

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

XVI. Explanations on Taxation

Corporate tax:

According to article 37 of the Corporate Tax Law, corporate income is taxed at the rate of 20% from January 1, 2006. According to regulation of Law Amending Certain Tax Laws and Certain Other Laws numbered 7316 this ratio has been identified at the rate of 25% to be applied to corporate income for the taxation periods of 2021 and 23% for taxation period of 2022 and The Council of Ministers has been authorized to reduce this rate up to 20%.

The tax legislation requires advance tax of 25% to be calculated and paid based on earnings generated for each quarter. Such advance taxes calculated and paid are offsetted against the final tax liability for the year.

Tax returns are required to be filed between the first and twenty-fifth day of the fourth month following the balance sheet date and paid in one instalment until the end of the related month.

According to the Corporate Tax Law, tax losses can be carried forward for a maximum period of five years following the year in which the losses are incurred. Tax authorities can inspect tax returns and the related accounting records for a retrospective maximum period of five years.

The Bank makes necessary provisions over results of current period operations related with Income Tax and Corporate Tax liabilities. The Bank has not any tax provision in current period. (December 31, 2020: None).

Deferred Tax:

The Bank calculates and reflects deferred tax asset or liability on timing differences, which will result in taxable or deductible amounts in determining taxable profit of future periods.

In accordance with TAS No: 12 “Turkish Accounting Standard on Income Taxes” and the circular of BRSA numbered BDDK.DZM.2/13/1-a-3 dated December 8, 2004, the Bank calculates deferred tax asset on carry forward tax losses and all deductible temporary differences except for general loan reserves, if sufficient taxable profit in future periods to recover such amounts is probable; as well as deferred tax liability on all taxable temporary differences. Deferred tax assets and liabilities are reflected in the accompanying financial statements on a net basis.

The deferred tax resulting from differences related to items that are debited or credited directly to equity is netted with these accounts.

Furthermore, as per the above circular of BDDK, deferred tax benefit balance resulting from netting of deferred tax assets and liabilities should not be used in dividend distribution and capital increase.

The net deferred tax asset is presented under deferred tax asset and the net deferred tax liability is presented under deferred tax liability on the balance sheet. The deferred tax income/expense is presented in the accompanying income statement as deferred tax provision and there is no deferred tax income/expense in current period. (June 30, 2020:None).

XVII. Additional Explanations on Borrowings

The borrowing costs related to purchase, production, or construction of qualifying assets that require significant time to be prepared for use and sale are included in the cost of assets until the relevant assets become ready to be used or to be sold. Financial investment income obtained by temporary placement of undisbursed investment loan in financial investments is offset against borrowing costs qualified for capitalization.

All other borrowing costs are recorded to the income statement in the period they are incurred.

The Bank has not issued convertible bonds.

NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

XVIII. Explanations on Issued Share Certificates

The Bank does not have any issued debt securities. As of the date of approval of these financial statements, there is no subsequent dividend announcement of the Bank.

XIX. Explanations on Acceptances

Acceptances are realized simultaneously with the payment dates of the customers and they are presented as probable commitments in off-balance sheet accounts.

XX. Explanations on Government Incentives

There are no government incentives utilized by the Bank.

XXI. Explanations on Segment Reporting

Since the Bank is not listed entity, disclosure requirements of TFRS 8 are not applicable for the Bank.

XXII. Explanations on Other Matters

A new type of coronavirus (COVID-19), which is first appeared in China, was classified by the World Health Organization as an epidemic affecting countries globally on March 11, 2020. The COVID-19 epidemic and the measures taken against it have impacts on economic conditions, sectors, businesses, consumers, as well as asset and commodity prices, liquidity, exchange rates, interest rates, money and capital markets and many other issues, and remain uncertain about the future. The impact of these effects on the Bank's equity management and capital adequacy, asset quality, credit risk, operational risk, currency risk, interest rate risk, liquidity risk, stock position risk arising from banking accounts, leverage ratio and other risks and indicators regularly monitored by risk monitoring units and Bank management. Although the effects of the situation are not fully known, it is expected to affect the financial position and operating results of the Bank in the future. The Bank takes the necessary precautions to keep the negative effects under control and minimize them.

Considering the magnitude of the economic changes due to COVID-19, it is aimed to update the financial information in the most recent annual financial statements in the interim financial statements prepared as of June 30, 2021, the Bank made certain estimates for the expected credit losses and disclosed them in Note VII of Section Three. In the next periods, the Bank will update its relevant assumptions as necessary and revise the realizations of past estimates.

Amount excluded from T2 due to cap (excess over cap after redemptions and maturities) which subject to Provisional Article 4 of the Regulation on Banks' Own Funds	-

(*) There are no amounts to be taken into consideration at the end of the transition period for the items subject to the transition provisions within the Provisional Articles of the "Regulation on Owners' Equity of Banks".

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF June 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

II. Explanations Related to Currency Risk

Foreign currency risk indicates the probability of loss that banks are subject to due to the exchange rate movements in the market. While calculating the share capital requirement, all foreign currency assets, liabilities and forward transactions of the Bank are taken into consideration and value at risk is calculated by using the standard method.

The Board of Directors sets limits for the positions and stop losses, which are followed up daily and weekly. Any possible changes in the foreign currency transactions in the Bank's positions are also monitored.

The announced current foreign exchange buying rates of the Bank at June 30, 2021 and the previous five working days in full TRY are as follows (Bank's FC evaluation rates):

	24 June 2021	25 June 2021	28 June 2021	29 June 2021	30 June 2021
USD	8.6631	8.6934	8.6991	8.7101	8.6530
CHF	9.4340	9.5014	9.4598	9.4414	9.3606
GBP	12.0586	12.1024	12.0985	12.0431	11.9702
100 JPY	7.8200	7.8580	7.8480	7.8680	7.8110
Avro	10.3476	10.4039	10.3706	10.3482	10.2692

The simple arithmetic averages of the major current foreign exchange buying rates of the Bank for the thirty days before at June 30, 2021 are as follows:

	Monthly Average Foreign Exchange Rate
USD	8.5995
CHF	9.4689
GBP	12.0581
100 JPY	7.8068
EURO	10.3571

II. Explanations Related to Currency Risk (continued)

Foreign currency sensitivity:

The following table details the Bank's sensitivity to a 10% increase or decrease in the TRY against USD and EURO. 10% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign exchange rates. Positive/ (Negative) number indicates a change in profit or loss and other equity where USD and EUR increase 10% against TRY.

	Change in currency rate in %	Effect on profit or loss		Effect on equity	
		June 30, 2021	December 31, 2020	June 30, 2021	December 31, 2020

III. Explanations Related to Interest Rate Risk

Interest rate risk shows the probability of loss related to the changes in interest rates depending on the Bank's position, and the Asset-Liability Committee manages it. The interest rate sensitivity of assets, liabilities and off-balance sheet items related to this risk are measured by using the standard method and included in the market risk for capital adequacy.

Risk Department performs duration, maturity and sensitivity analysis to protect the effect of interest rate volatility and reported to the Asset-Liability Committee.

Simulations on interest income are performed in connection with the forecasted economic indicators used in the budget of the Bank. The negative effects of the fluctuations in the market interest rates on the financial position and the cash flows are minimized by revising budgeted targets.

The Bank management follows the market interest rates daily and revises the interest rates of the Bank whenever necessary. Since the Bank does not permit maturity mismatches or imposes limits on mismatch, a significant interest rate risk exposure is not expected.

Information related to the interest rate sensitivity of assets, liabilities and off-balance sheet items (based on repricing dates):

Interest rate risk arising from banking accounts:

According to the "Regulation on Measurement and Evaluation of the Interest Rate Ratio of Banking Accounts Based on Standard Shock", which is divided into different currencies of the Bank, the following table shows the economic value differences arising from interest rate fluctuations as of June 30, 2021:

Type of Currency	Shocks Applied (+ / - basis points)*	Gains / Losses	Gains / Equity – Losses / Equity
TRY	500	(59,483)	%(11)
	(400)	55,506	%10
EURO	200	(975)	%0
	(200)	1,011	%0
USD	200	(1,278)	%(0)
	(200)	1,314	%0
Total (of negative shocks)		57,831	%10
Total (of positive shocks)		(61,736)	%(11)

*Separate lines are entered for each shock with a different magnitude and direction applied to a currency.

IV. Explanations Related to Equity Securities Risk

The Bank has no outstanding stock position.

NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF June 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

V. Explanations on Liquidity Risk Management and Liquidity Coverage Ratio

Liquidity risk occurs when there is insufficient cash or cash inflows to meet the cash outflows completely and timely.

Liquidity risk may also occur when the market penetration is not adequate, when the open positions cannot be closed quickly at suitable prices and sufficient amounts due to barriers and break-ups at the markets.

The Bank's policy is to establish an asset structure that can meet all kinds of liabilities by liquid sources at all times. In this context, liquidity problem has not been faced in any period. In order to maintain this, the Board of Directors of the Bank continuously determines standards for the liquidity ratios, and monitors them.

According to the general policies of the Bank, the matching of the maturity and interest rate structure of assets, and liabilities is always established within the asset liability management strategies. A positive difference is tried to be established between the yields of TRY and foreign currency assets and liabilities on the balance sheet and their costs. In this sense, various crisis scenarios, which are prepared by risk management group, are presented to management and audit committee.

When the funding and liquidity sources are considered, the Bank covers majority of its liquidity need by deposits, and in addition to this source, it makes use of pre-financing and syndication products to generate additional sources.

Bank calculated liquidity adequacy ratio in both foreign currency and total amount as per Basel III, and reported to BRSA according to Bank's Regulation on Measurement and Evaluation of Liquidity Adequacy Ratio declared in 2013. Furthermore, the Bank reports liquidity risk analysis form weekly to BRSA in 2013.

The unconsolidated lowest foreign currency is (19/06/2021) (%349) and the unconsolidated highest foreign currency is (11/05/2021) (%546) and total liquidity coverage ratios are (11/04/2021) (%234) at the lowest and (11/05/2021) (%391) at the highest while which are calculated weekly for the last three months.

Liquidity risk in a Bank is evaluated separately with respect to normal market conditions and market fluctuations, which can possibly occur. The bank makes the required diversification in its assets and liabilities via considering related currencies in order to meet its obligation to pay.

Liquidity deficit report is issued through the quantitative evaluation of daily and cumulative deficits in local currency and foreign currency in the framework of ordinary and stressful environment. Liquidity deficit report includes deficit-maturing liabilities in any period of borrowings and placements made in order to replacement assets. Liquidity deficit report is based on current balance sheet and includes off-balance sheet derivative transactions and commitments, which can affect the balance sheet. Liquidity report is issued quarterly over TRY and foreign currency.

Liquidity Risk Measurement is to determine the non-conformance between assets and liabilities, which can occur because of challenges encountered in decreasing the asset positions if the assets of the Bank are pledged, and the assets cannot be sold with relative ease or the market returns to liquid assets at different levels. The liquidity of the Bank is designed to meet the due liabilities of the bank. The courses followed by the bank to reach the aforementioned purpose are as follows:

- Measurement of day liquidity
- Short term funding
- Liquid assets
- Structural liquidity
- Diversification of liquidity resources
- Stress tests

TURKLAND BANK ANONİM ŞİRKETİ
NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF June 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

V. Explanations on Liquidity Risk Management and Liquidity Coverage Ratio (continued)

The Treasury department in coordination with marketing department performs liquidity management while stress test and scenario analyses studies are performed under the coordination of Risk Management Group with the views and suggestions of other related departments. Results of stress test are reported to executives regularly and submitted to Audit Committee quarterly by the Risk Management Group. Loan losses, delays in loan repayment and deposit withdrawals are used as variables in these stress test scenarios. Additional capital allocation is not made for liquidity risk.

Stress tests examine the possible effect of an event on balance sheet and net potential cumulative deficit quantitatively and foresee the required additional funding with respect to a defined stress scenario. Stress tests are performed quarterly over TRY and foreign currency unless they are required to be performed more often due to a change occurring in market conditions.

The bank operates periodical liquidity analyses, which compare the inflows and outflows of funds and cover a specific period. The following issues are taken into consideration in these analyses:

- Assumptions based on anticipated inflow and outflow of funds
- Capability of bank to convert its assets into cash
- Liquidity instruments provided by the Central Bank
- Loss of value which occurs while liquidating assets in market fluctuations
- Market conditions for specified several asset classifications

Sensitivity tests are performed periodically with scenarios, which are peculiar to banks and particular to the market. These scenarios are reviewed periodically.

Chief Economist presents a short explanation regarding the recent developments in market in Committee of Assets and Liabilities meetings. Departments of Treasury, Budget Planning and Management Reporting and Retail Banking inform the Committee regarding the recent liquidity of the Bank.

Credit/Deposit rate defined by the Board of Directors of the Bank provides short-term liquidity needs of the bank not to drop below a certain level of liquidity. The Credit/Deposit rate is monitored by departments of Treasury, Budget Planning and Management Reporting and Retail Banking and discussed in Committee of Assets and Liabilities meetings. Decisions regarding liquidity are made in the light of aforementioned information. The Treasury examines weekly Liquidity Analysis Form, biweekly Stock Liquidity Rate Notification Form and weekly Liquidity Rate Notification Form (first maturity segment) and related departments in order to determine liquidity balance between assets and liabilities of the Bank in accordance with the communique of Banking Regulation and Supervision Agency.

High quality liquid assets consist of cash assets, central banks, securities and reverse repo items.

A significant proportion of daily cash inflow of the Bank consists of payments related to loans issued and placement of banks while a significant proportion of daily cash outflow of the Bank consists of payments related to collected deposits. Domestic and foreign banks and loan clients constitute the resource of cash inflows. The bank applies limits for the transactions, which shall be made with domestic and foreign banks, and these limits are monitored by the Risk Management Department daily.

The Bank has performed forward exchange, swap and option transactions with foreign financial institutions during 2021.

VII. Explanations Related to Risk Management

Notes and explanations in this section have been prepared in accordance with the Communiqué on Disclosures about Risk Management to be Announced to Public by Banks that have been published in Official Gazette no. 29511 on October 23, 2015 and became effective as of March 31, 2016. According to Communiqué must be presented on a quarterly basis. Due to usage of standard approach for the calculation of capital adequacy by the Bank, the following tables have not been presented:

- RWA flow statements of credit risk exposures under IRB
- RWA flow statements of CCR exposures under the Internal Model Method (IMM)
- RWA flow statements of market risk exposures under an IMA

Bank's Risk Management Approach

Risks for all banking processes and related sub-processes are identified and risk values are defined. In order to evaluate the effectiveness of the defined risk-based controls, the risk values are now automatically calculated and the changes are monitored continuously. The Bank focuses on lending in the corporate and SME segments, operates within the limits set for market risk, and cannot carry operational risk appetite in order to minimize operational risk. The bank's risk profile and business model are integrated under the risk appetite policy. Accordingly, the Bank must proceed in line with the limits set in the business model.

The structure and organization of the risk management system in terms of the function and responsibilities of the Risk Management Group depends on the Board of Directors. Loyalty to the Board of Directors takes place through the Audit Committee. Risk Management conducts its activities under the supervision of the Audit Committee within the framework of the provisions of the "Regulation on Internal Systems of Banks and Internal Capital Adequacy Assessment Process" published by BRSA. Risk management considers credit, market, interest rate, concentration, liquidity risks and operational risks in their works as the basic principle to establish the limits of these risks and control processes. The Bank has established a stress-test-driven management by taking into account the changes in the market, as well as the maximum amount of loss that may arise in Credit Risk, Operational Risk, Market Risk and other risks within the scope of internal capital management.

Policies, procedures, workflows and similar documents published by internal systems and all other departments are in a common portal accessible to all bank employees, and changes made to existing documents or newly published documents are provided to employees via e-mail. There are many policies and procedures including Credit Policy, Risk Management Policies (Risk Appetite Policy, Market Risk, Liquidity Risk, Operational Risk, Concentration Risk, Country and Counterparty Risks etc.) assessed and reviewed annually.

The Risk Management Department inform the Board of Directors and top management by monthly basis reports on credit risk, market risk, and operational risk areas. Credit risk concentration (borrower/group, business line, sector, maturity, currency, collateral etc.), analyses on the defaulting loan portfolio and stress tests, and analyses of capital adequacy; internal and legal market risk limits and compliance with operational risk losses. Apart from this, with the PD analysis reports made in the field of Credit Risk for 3 months, various breakdowns are analysed based on the number of defaults in which the borrower has the default rate. In addition, the report of the Audit Committee, which is prepared for 3 months, includes analyses on all risk types (capital adequacy, limits on market and liquidity risk, defaulting loan portfolio, sectoral information, credit concentration, risks related to information technology, etc.).

The Bank reduces the risks arising from the credit activity as determined by the process and policies it has established. The main instrument used in risk mitigation is collateral, and the collaterals obtained by the collateralization policy are managed by the Credits and Risk Management divisions such as portfolio, customer, collateral type, etc. and monitored regularly.

Risk management strategies and practices are defined as follows: The Bank's Risk Management Group was established in 2001 as an independent unit which reports to the Member of Audit Committee have been responsible for the Audit, Internal Control and Risk Management.

Risk management is committed to control processes in order to determine the limits and measurement of operational risks, including the risks comprising of credit, market, interest rate, concentration, counterparty, liquidity, banking accounts and IT risks.

Objective of risk policies: In line with "Regulation on Internal Systems of Banks (published in the Official Gazette dated July 11, 2014 numbered 29057)", sustaining the Bank's operations in accordance with the Banks' strategic plans, mission, targets, profitability and productivity principles by determining Bank's risk strategy and maximum risk level in line with the volume, qualification and complexity of the Bank's operations by taking into consideration the Bank's past experience and performance. Moreover, ensuring to conserve the interests of depositors and the Bank's shareholder's interest at a maximum level.

Risk management regularly reports to Senior Management and the Audit Committee all the risks the bank is exposed to and concentrations, and the Bank's own internal limits of the legal limits are monitored daily, weekly, monthly and quarterly. These reports consist of VAR analysis, market risk limits, stress testing and scenario analysis, liquidity and interest rate, economic capital and capital adequacy analysis. These reports (daily value at risk (VAR) analysis, weekly interest rate risk, market risk limits and contains the calculation of economic capital) are also presented to Asset-Liability Management Committee on a weekly basis. Volatility and closing values of a large number of market risk instruments are closely monitored and reported on a daily basis.

Quarterly stress tests and scenario analyses on economic capital, capital adequacy, liquidity and profitability scenarios and credit risk on Bank's loan portfolio including benchmark of similar banks are presented to the Audit Committee. Management follows the Bank's performance and the limits by using these detailed reports.

The Bank has a system set reporting in accordance with the legislation and the standard shock method for measuring and evaluating the interest rate risk arising from on-balance sheet and off-balance sheet positions in the banking accounts by using the standard shock method. The Regulation on Measurement and Evaluation and the Regulation on Credit Risk Mitigation Techniques is intended to be reported based on risk classes according to the procedures described. In addition, the liquidity coverage ratio calculated under Basel III is calculated using a separate reporting system and it is aimed to measure and monitor the balance between the Bank's net cash outflows and high quality liquid assets and total and foreign currency liquidity coverage ratios.

Risk Management Group calculates Basel II capital adequacy calculation systematically, namely Credit Risk, Market Risk and Operational Risk, in accordance with "Regulation on Measurement and Assessment of Capital Adequacy of Bank's" published in the Official Gazette dated October 23, 2015, numbered 29511.

From January 1, 2014 equity and the capital adequacy ratio of the Bank is calculated in accordance with the "Change in the Regulation on Measurement and Assessment of Capital Adequacy Ratios of Banks" published in the Official Gazette no. 29511, dated October 23, 2015 and "Regulation on Equities of Banks" published in the Official Gazette no.28756, dated September 5, 2013.

NOTES TO THE UNCONSOLIDATED FINANCIAL STATEMENTS
AS OF JUNE 30, 2021

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VII. Explanations Related to Risk Management (continued)

The Bank updated its disclosures in accordance with the “Change in the Communiqué on the Financial Statements to be announced to public by Banks as well as Explanations and Footnotes Thereof” published in the Official Gazette no.28983, dated April 26, 2014 and in accordance with “Communiqué on Disclosures about Risk Management to Be Announced to Public by Banks” published in the Official Gazette no.29599, dated January 20, 2016.

At the Bank, by considering Regulation on the Internal Systems of Banks published in the Official Gazette No. 29057 dated July 11, 2014, banking processes and policies were revised. Consequently, related procedures/policies are updated/formed and then approved by the Board of Directors.

In order to manage operational risks that the Bank is exposed to more effectively and form an integrated risk management point of view, Operational Risk Policy and IT Continuity Plan was updated, Data Management Procedure was formed. In order to define, measure, limit and report market risk the Bank is exposed to, Market Risk Policy is formed. When the Bank manages its treasury securities portfolio within the limits determined by the Board of Directors, Risk Management Group checks whether Treasury Department is within these risk limits.

Liquidity Risk is the risk that the Bank cannot fulfil its payment obligations fully and on time due to its insufficient cash inflow or due to inadequate available cash resulting from the mismatch between cash inflows and outflows. In order to define, measure, follow, report the liquidity risk the Bank is exposed to and take necessary actions for the results, Liquidity Risk Policy is formed. When Liquidity Risk Policy is formed, to manage the net liquidity position and liquidity requirement on an ongoing and forward-looking basis is aimed at.

Concentration risk is the risk within credit risk that is exposed according to individual debtor and debtor groups, to debtor groups that indicate similar characteristics in terms of economic and regional sector qualities, on the basis of the assets subject to the collateral securities that show similar price pattern behaviour; the risk that is to be considered also within the scope of the market risk and operational risk. In order to define, measure, follow and manage the concentration risk the Bank is exposed to, Concentration Risk Policy is formed. Concentration limits are monitored in compliance with the credit, deposit and related policies.

Counterparty credit risk refers to the default risk of the counterparty of the transaction before the last payment in the cash flow of this transaction of which brings an obligation to both sides. In order to define measure, follow and manage the counterparty credit risk the Bank is exposed to Counterparty Credit Risk Policy is formed. Counterparty credit risk management is conducted by the Financial Institutions Department of the Bank by taking into account the counterparty’s financial reports, general overview, rating, current and expected transaction volumes with T-Bank. The limits for counterparties are determined by the Board of Directors.

"Banking Book" includes all Assets and Liabilities (including credit) except trading securities portfolio. In order to define, measure, follow, report the interest rate risk related to banking book risk the Bank is exposed to and take necessary actions for the results, interest rate risk policy related to banking book is formed. Interest rate risk is managed by senior management in order to avoid losses from adverse interest rate movements.

Regarding internal assessment process (ISEDES / ICAAD) which aims at the Bank has capital requirement according to its risk profile, Internal Capital Management Procedure is formed. Within internal capital management scope, the Bank has established a stress test based management by taking into account the estimated maximum loss amount that may occur in credit, operational, market and other risks as well as the changes in the market.

In order to ensure that the Bank’s term deposit structure is in line with the Bank’s strategies and budget targets and is in a robust and sustainable structure, Deposit Policy is formed. Policies and systems in order to define, measure and follow the concentration risk of the Bank’s deposit is also explained in Deposit Policy.

Organization and structure of Risk Management Group: Risk Management Group work under the Board of Directors as their functions and responsibilities. The connection with the Board of Directors and Risk Management Group is provided through the Audit Committee.

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

VII. Explanations Related to Risk Management (continued)

Risk Reporting and Scope and Nature of Measurement Systems: Limits and market risk reports are presented daily basis by the Risk Management Group, value at Risk report (ALCO), ECAP stress test, scenario analysis, Duration Gap primary shock, the market data and limit reports are presented a weekly basis to Assets-Liability Committee. On a quarterly basis, the rest of the reports and other works are reported to Audit Committee and Board of Directors.

Hedging Risk and Process of Risk Mitigation Policies and Process Related to Control Their Effectiveness Continuously: Bank carries out risk mitigation processes and risk hedging for credit risk in accordance with credit risk policies.

Risks related to market risk are measured and monitored in accordance with application procedures and policies. In this respect, the Board of Directors allocates the limits. Limits are monitored, reported, in the event of any limit exceed it is reported to relevant committees and units through documentation by electronic mail. In addition, information about limits on use and loan segment concentration is presented to Audit Committee and the Board of Directors quarterly.

Total		1,541,970	100.00	1,334,485	100.00

The Bank uses three main factors for internal credit rating system. These are financial data, non-financial data and specialist decisions. Financial data consist of liquidity, financial structure, profitability, growth ratios and turnover rate. Non-financial data consist of loan client business, relation with finance sector and sector analysis. The Bank measures the credit rating of companies by making comparisons regarding the financial data and non-financial data.

In the existing rating system, the collateral assigned to loans are not taken into account in the rating. The information about customers with F, E and D- rating is shown below.

“F” rating;

There are no clients with “F” rating (December 31, 2020: None).

(Amounts expressed in thousands of Turkish Lira (TRY) unless otherwise stated.)

II. Explanations and Disclosures Related to the Liabilities (continued)

8. Information on provisions (continued)

d) Information on employee termination benefits and unused vacation accrual (continued):

d.1) Table of provision for employee of benefits:

	June 30, 2021	December 31, 2020
Employee termination benefit provision	11,650	11,371
Unused vacation provision	4,450	3,042
Total of provision for employee benefits	16,100	14,413

In accordance with TAS 19 “Turkish Accounting Standard on Employee Benefits”; total benefit is calculated for each employee who has completed over one year of service, whose employment is terminated due to retirement or for reasons other than resignation or misconduct. The cost of providing benefits to the employees for the services rendered by them under the defined benefit plan is determined by independent actuaries annually using the projected unit credit method. All actuarial gains and losses are recognized in the income statement. According to communique numbered 28585 dated March 12, 2013 published in Turkish Trade Registry Gazette, as per TAS 19 actuarial gain that is recorded under shareholders’ equity amounting to TRY 545 as of June 30, 2021 (December 31, 2020: TRY 225 gain).

e) Information on other provisions:

e.1) Provisions for possible losses: None.

e.2) The breakdown of the sub accounts if other provisions exceed 10% of the grand total of provisions:

SECTION SEVEN (*)

INFORMATION ON INTERIM ACTIVITY REPORT

Chairman's and General Manager's Message

Dear Shareholders ;

We experienced the first half of 2021 with full closure under the negative effects of Covid-19. We have also experienced promising developments with the start of the rapid vaccination program. As of July, we started to recover rapidly with the introduction of vaccination to all our citizens over the age of 18 and the realization of economic and social changes.

With our prudent policies and healthy balance sheet management, despite the negative effects of Covid-19, we achieved our target. Our Bank's total assets were TRY 3.3 billion, loans TRY 2.3 billion and deposits TRY 2.3 billion. In the first half of 2021, our Bank announced a net profit of TRY 71 million and our Bank's capital adequacy ratio was 16.90%. In addition to positive statement, we did not anticipate a serious risk on the problematic loans in this difficult period.

Our strategy for the future is to carefully manage the risk portfolio and expand our customer network in promising industries. Furthermore, we will also continue to strive to increase the commercial finance business by investing in the advanced network of our shareholders in the MENA region.

Finally, on behalf of T-Bank management, we thank our customers for their continued trust, our shareholders for their strong support and all our employees for their devoted work.

Changes in the Articles of Association during the period:

None.

Assessment of Financial Position:

In the first half of 2021; assets of Turkland Bank A.Ş. reached TRY 3,310 million, loans reached TRY 1,886 million, guarantee and bills are TRY 1,791 million.

In the first half of 2021, securities portfolio reached TRY 325 million.

In the first half of 2021, deposit volume reached TRY 2,257 million.

In the first half of 2020, the Bank's net profit was TRY 71 million and also in the first half of 2021 net profit was TRY 71 million.

Credit risk and capital adequacy

As of June 30, 2021 capital adequacy ratio of the Bank is 16.90% and above legal requirement which is 8%.

Non-performing loans in total loan portfolio is 32.99% and provision for non-performing loans is 43.67%.

Turkland Bank at the end of the second quarter of 2021

T-Bank is presented in one of Turkey's leading financial and industrial centres with its 14 branch offices and a staff of 297 employees.

Determined to be a solution partner for its customers, T-Bank focuses on raising the quality of its services and products within the framework of its sustainable growth strategy. Thus, the Bank increases its satisfaction and loyalty rate every day and aims to provide its customers with a unique banking experience.

T-Bank manages to transform its effective and broad correspondent bank network in the Middle Eastern and North African region of its main shareholders into a competitive edge. The Bank also seeks to establish long-term relationships with banks that will add value to its services and further strengthen its financial structure.

(*) Amounts presented in Section Seven are expressed in thousands of Turkish Lira (TRY) unless otherwise stated.
